Lithoss

Mastery in Belgium

Lithoss's commitment to quality is what sets us apart from the rest. With over 20 years of experience, we meticulously manufacture each product in Belgium, utilizing premium materials to exceed expectations and maintain the superior craftsmanship that embodies Belgian excellence.

What truly distinguishes Lithoss is the boundless array of possibilities we offer. From functionality to finish, installation options to personalization, our products cater to every preference. Whether it's selecting a specific finish, customizing with a personal engraving, or integrating an assorted door handle, Lithoss tailors to your individual style, drawing inspiration directly from you.

In addition to aesthetics, Lithoss caters to diverse needs with a comprehensive range of product variations. From switches and sockets to USB chargers, sensors and thermostats – all designed to integrate smoothly with advanced automation technology – we provide solutions that transcend mere functionality.

Furthermore, we offer compatibility with various home and building automation systems such as KNX and Casambi, ensuring seamless integration and enhancing the functionality of your space.

Design, Exploration & *Craftsmanship*

Our unique, handcrafted products showcase our dedication to quality and love for design. We are always on the move, staying updated with the latest trends in interior design, architecture, lighting, home automation and lifestyle. This continuous exploration for innovation has enabled us to stay ahead of the curve and surpass common quality standard for over twenty years.

Elements *of pureness*

Celebrate the essence of pure design with Lithoss, where compromise finds no place. Our sleek and minimalist designs underscore the allure of even the smallest Lithoss button. Crafted from exclusive Belgian materials, our products capture the essence of enduring quality. Explore the exceptional solidity of these materials, ensuring quality that stands the test of time. Welcome to a world where Lithoss elevates every detail to a standard of timeless sophistication.

Is it any wonder that the Lithoss designs have won several awards?

Living *Textures*

The living
textures
create rich,
subtle accents
in any interior

Unique, hand-made products

Touching a Lithoss switch, socket, or dimmer is to connect with the very essence of Lithoss. You'll immediately sense the quality sensation of raw and authentic materials. Each surface feels vibrant yet subtle, as if delicately brushed by an artist's hand. These rich textures are meticulously crafted through manual processes, such as sanding, polishing, and galvanic treatments in etching baths. Treated with care and attention, they will interact with light; creating a dynamic interplay of color and perception that shifts with the angle and intensity of illumination.

Synergy *with TAL*

Joined through the exclusive use of premium materials such as anodised or powdercoated aluminium, the integration of switches, sockets and lighting forms a unified harmony within your design concept. It's a testament to our commitment to holistic design, elevating it to new heights with Lithoss and TAL working in tandem.

Check out our luminaires collection to find examples of that perfect synergy between our sister companies such as the beautiful berrier swivel on page 69.

NEW

Floating

Mind the gap.

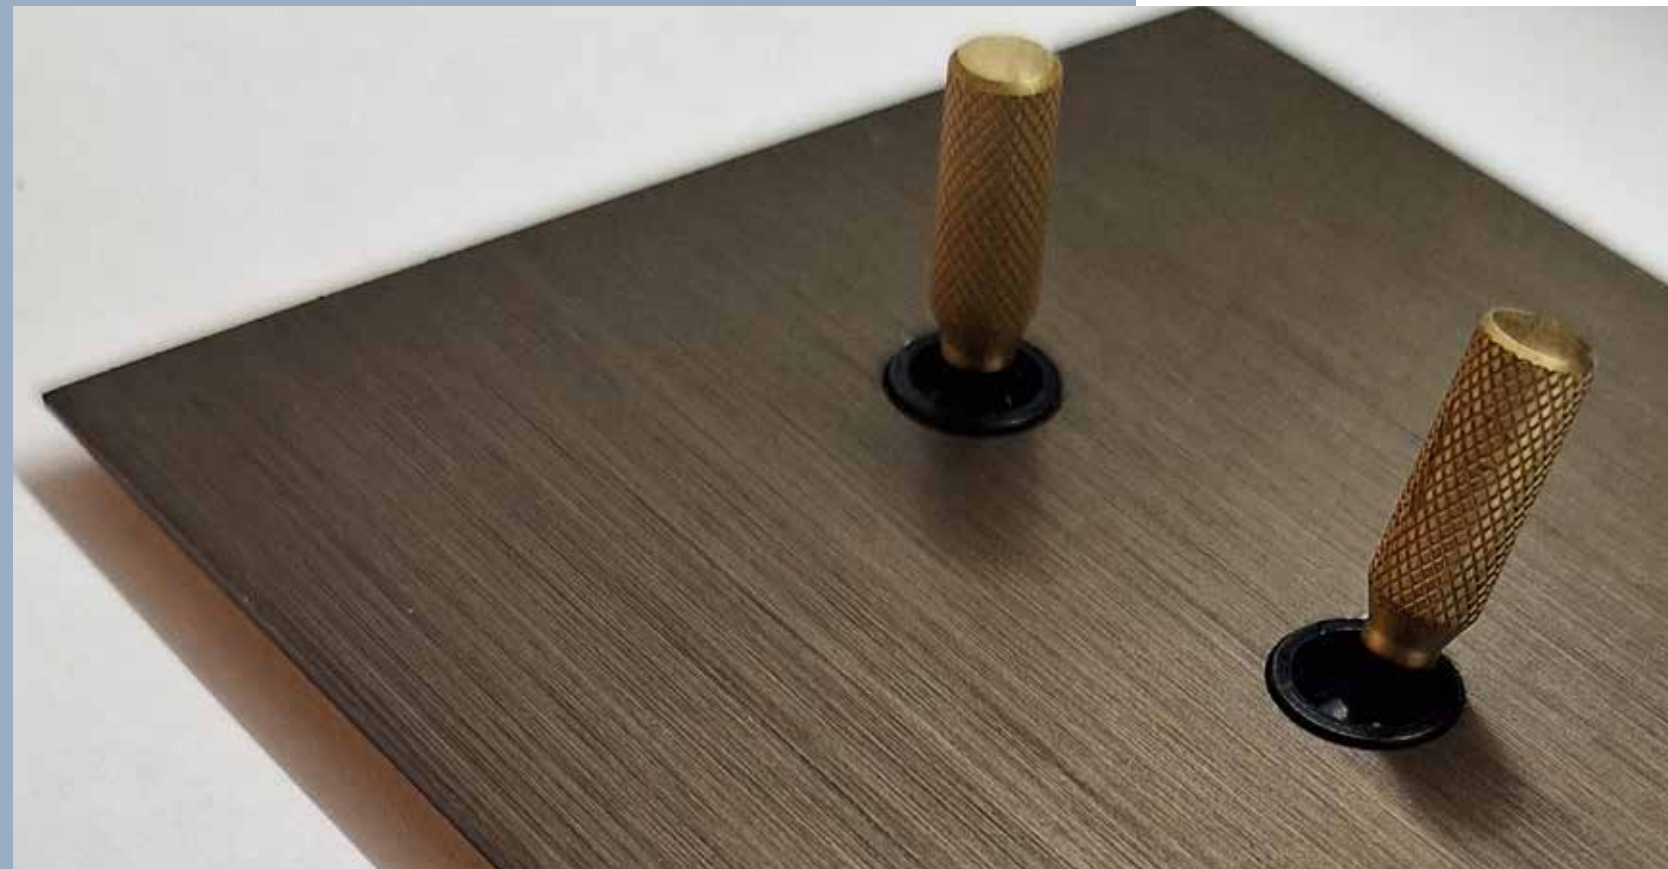

Design by Lithoss Design Studio

The classic Lithoss switch, known for its iconic design, receives a sophisticated refresh while maintaining its signature elegance. Thanks to a subtle yet thoughtful innovation, the switch now appears to be floating off the wall, creating a refined and luxurious aesthetic.

Striking the perfect balance between craftsmanship and innovation, Lithoss elevates the art of a switch to new heights. The use of premium materials, meticulous attention to detail, and timeless design make this switch not just a functional element, but a true statement piece in any interior.

Every aspect, from its sleek edges to its flawless finish, exudes pure craftsmanship.

This reinterpretation of an icon proves that timeless class and modern finesse can go hand in hand. The Lithoss switch remains the benchmark for those who value design, quality, and exclusivity.

Select

The first series, but still surprising

Design by Bart Spillemaeckers

Lithoss was established at the turn of the century by installer Bart Spillemaeckers to meet the rising demand for exclusive, timeless, and sophisticated switches. The inaugural series, SELECT, set the stage for Lithoss' product range—a collection distinguished by its enduring design.

Over time, SELECT has evolved into a global trendsetter, boasting an impressive portfolio of reference projects, including renowned establishments like Hotel 1898 The Post in Belgium, the Rosewood Hotel in Austria, and Nana Beach Hotel in Crete, Greece.

Comprising a diverse spectrum of 15 finishes, the SELECT series offers unparalleled customization options for your switches. Through an ongoing process of radical innovation in materials and finishing techniques, the SELECT concept continually evolves. Prepare to be surprised by the timeless elegance and sophistication of SELECT.

Cockpit

Design by Lithoss Design Studio

Cockpit presents the ultimate design solution for your renovation projects. This 6-ampere two-way switch offers straightforward connection to your conventional installation, ensuring convenience and versatility. Available in the renowned stylish finishes of Lithoss, including the bestselling Bronze Antique and the popular Gunpowder Black, Cockpit adds a striking touch to both traditional and ultramodern interiors.

The distinctive character of the Cockpit switch shines through its handmade finishes and matching toggles. The cone shape evokes a classic and timeless aesthetic, while the knurling adds a sought-after vintage appeal, elevating your switch with a touch of nostalgia.

Aesteem, a fusion of 'aesthetics' and 'esteem', was honored with the Henry van de Velde label and also received a **design award** in the same year. This recognition is attributed, among other factors, to the switch's sleek and architectural appearance. Like all other Lithoss products, Aesteem boasts a distinctive design centered around the square as its basic form.

The switch meets all contemporary requirements without compromising on authenticity and craftsmanship. Aesteem stands out as the only switch capable of accommodating 8 push buttons within a single module. Additionally, Aesteem offers sockets in the same design, providing a cohesive solution to complete your project.

Dimmers

Design by Lithoss Design Studio

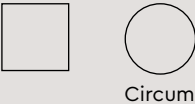

For our DIMMER collection, showcasing a contemporary vintage aesthetic, we drew inspiration from the handles and cone-shaped buttons found in a cockpit. Despite how common dimming modules and home automation systems have become, there's still a special satisfaction in physically turning a button to create atmosphere and coziness. Lithoss offers you the

opportunity to do so in style. The design of the button—whether the traditional cone shape or the diamond-pattern knurl shape—is a testament to true craftsmanship: skillfully shaped with an excellent grip and an authentic touch. Paired with the cockpit switch, you can effortlessly infuse a contemporary vintage look into your interior with sophistication.

Place your mobile casambi dimmer wherever seems most convenient to you by using our angled surface box, ref. ACCo16.

Sockets

Design by Lithoss Design Studio
& Bart Spillemaeckers

Designed for functionality

Consider the convenience of combining a switch with a socket in one panel. This section showcases a range of sockets that aligns perfectly with Lithoss' design philosophy. While our Void collection was previously known solely for its square shape, since the beginning of 2021, we've introduced sockets in a round form, adding a touch of gracefulness to the collection. To ensure global compatibility, we've expanded our range to include Opera, Britanica and Helvetica. Whereas Opera caters to the Italian market's needs and Britannica focuses on the refined implementation of British sockets, you can now also find our elegant solutions for the Swiss market with our new Helvetica range.

Within our Void Square collection, you have the freedom to choose the desired module for installation within our 45x45 square opening. Please note that the module is not included in the delivery. With our Void round series, our square cover plates come with a round power outlet opening, to give you that modern touch and sleek appearance.

Love the elegance of round shapes? With our Circum socket series, we're taking it to the next level! This latest addition to our range embodies the captivating charm of rounded aesthetics, where every detail is carefully considered to radiate elegance.

Luminaires

Design by Lithoss Design Studio & TAL

ADD LUMINAIRES
TO YOUR
CONFIGURATION

The LUMINAIRES collection serves as the perfect finishing touch to any turnkey project, whether in residential or hospitality settings. The Lithoss design blends functionality with creativity, making it suitable for a variety of applications.

A standout feature of the collection is the Lithoss push button & reading light combination, a bestseller that exemplifies the perfect synergy between Lithoss and our sister company TAL.

This luminaire can be effortlessly combined on a 2-fold, 3-fold, or even 4-fold front plate, offering versatility and customization options. Additionally, the Gatekeeper and Nightguide are innovative design solutions designed for orientation lighting in spaces such as stairwells and hotel rooms, enhancing both safety and ambiance.

NEW

Obtain your favourite lighting fixture in anodised colours such as brushed Bronze, Gold and Titanium.

the TAL anodic brochure

Setups & Combinations

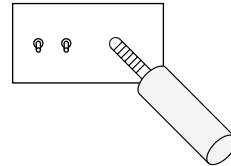

Luminaires works great with Cockpit, Select, Squares and Dimmer.

STANDARD COLLECTION

European Standard

Our products are originally designed for the standard European market using wallboxes with a heart to heart distance of 71mm. In a response to popular demand, Lithoss expanded its product range to the Italian, British and Swiss market by introducing the Opera, Britannica and Helvetica frames.

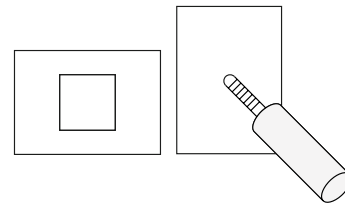

BRITANNICA

Fits only on a British Standard double and Italian 504E electrical wall box. Our European standard collection is compatible with the single British Standard wall boxes. Horizontal & vertical solutions.

OPERA

Designed for Italian Standard 503E and US single wall boxes. Horizontal & vertical solutions.

HELVETICA

NEW

Swiss Standard

It wasn't an easy job but thanks to great teamwork together with our Swiss distributor, we are proud to announce that we have our product ranges now compatible with the SWISS standard wall boxes round and square shaped.

NEW DIMENSIONS SEE PAGE 114

Swivel

NEW

Meet Berrier Junior SWIVEL. Lithoss & Tal's design team joined forces to write a new chapter in their jointly successful Luminaires story. They soon came up with the idea of combining TAL's iconic Berrier with Lithoss' unique finishes and combination options.

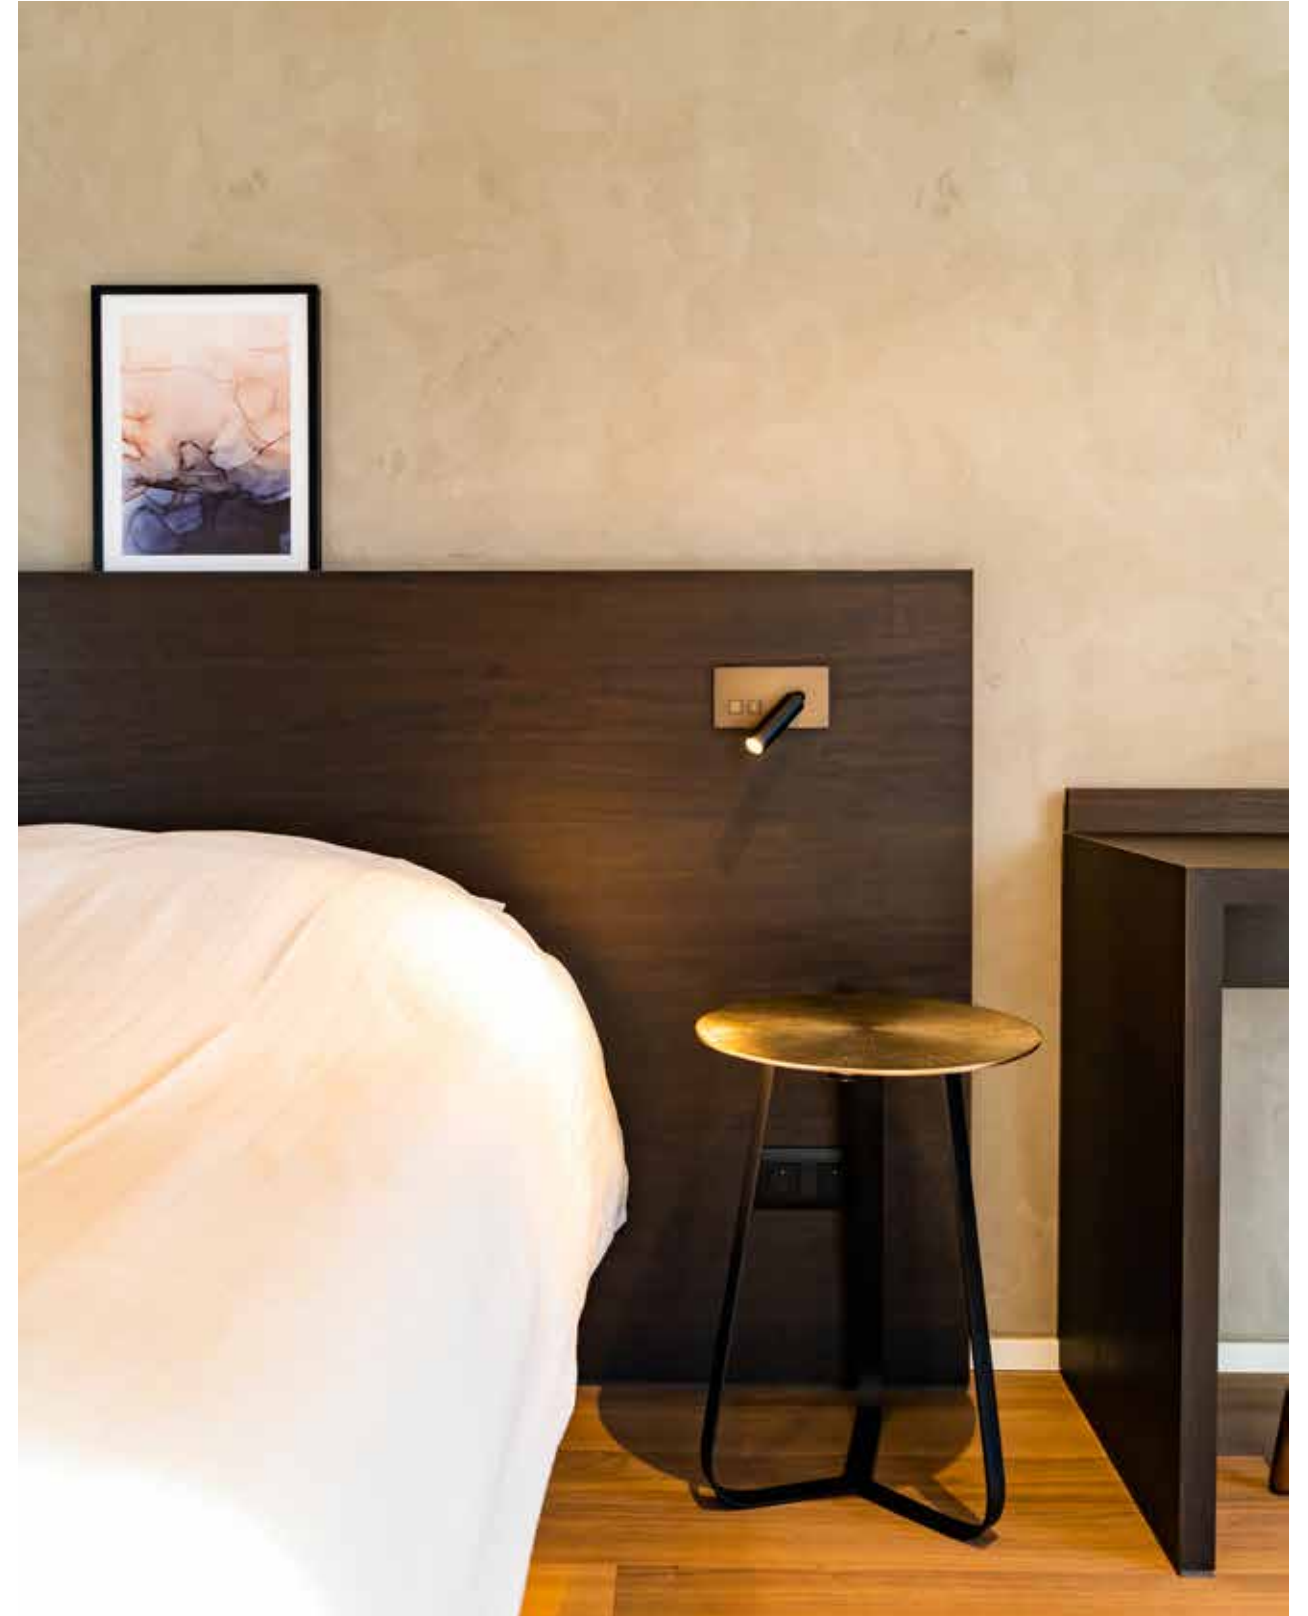

A new product was developed, Berrier Junior Swivel. The Berrier was created with an intelligent magnet system that allows the Berrier to be rotated smoothly in all directions.

INFO

We proudly present... the iPad Canvas!

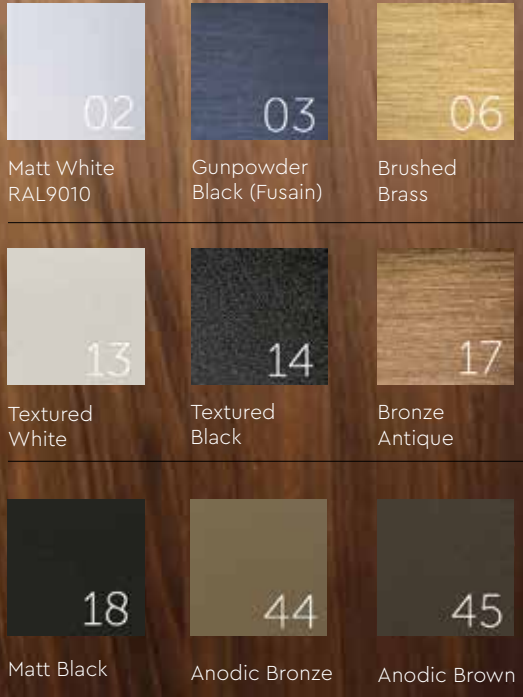

The iPad Canvas is designed to enhance the digital experience with its timeless design and sleek finish. With its clever magnetic system and central cable pass-through, it offers a secure, organized and stylish solution for using iPads in both portrait and landscape positions. From now on, you won't have to deal with cable clutter and be assured of a tidy workspace.

- Timeless slim design.
- Suitable for (7th-8th-9th gen iPad) – 10,2"
- Screwless cover in 9 possible high quality finishes.
- Simple and secure iPad installation using the smart magnetic system.
- Portrait or landscape mounting.
- Easy cable connection with the center cable guide (adapter and lightning cable not included)

Did you know?

Design by Lithoss Design Studio

Frame+ Button+ Cover plate

Our Select, Circum, Dimmers, and Cockpit collections are designed with a smart, modular approach — each product is made up of three distinct parts:

First, the frame is installed. Next, the push buttons or switch mechanism is added. Finally, the cover plate effortlessly snaps into place.

This modular system gives you the freedom to mix and match finishes and colors to suit any interior style. Choose a uniform look with all three parts in the same finish, or create a custom combination with two or even three different finishes.

For example, pair a bronze antique frame and button with a cover plate in a specific RAL color for a unique and personalized design. Some examples of customs.

Please contact us to obtain more info about possible combinations.
info@lithoss.com

Sneak Peek

Design by Lithoss Design Studio

The design studio of Lithoss is working on some new products that will be revealed in 2025. A glimpse of these renders may trigger and inspire you for some upcoming projects.

Pixel 6-fold

Introducing our new minimalist switch featuring 6 precision-engineered buttons. Designed in response to popular demand, it offers just the right amount of control without unnecessary complexity. Its clean aesthetic blends seamlessly into any modern setup. Built for reliability, each button provides a tactile, satisfying click. Simple, functional, and made to meet exactly what users asked for. In the future also available on KNX.

Void / Socket Outdoor

Finished in Textured Black, this outdoor outlet reflects the essence of Lithoss—understated, precise, and enduring. Its matte surface and monolithic presence blend effortlessly into contemporary architecture, offering a discreet yet deliberate touch of design clarity. Function meets form, without compromise.

designs and names are subject to change.

Room service included

Hotel
1898
The Post
Ghent

Over the years, Lithoss has received numerous requests from customers seeking something unique for their hotels. Thanks to our flexibility, many of these requests have been successfully fulfilled. These requests include customized card readers for hotel rooms, personalized room numbers, or combinations of card readers and switches.

Our switches offer the option to be printed or engraved with your desired text or symbols on the button and/or cover plate. Laser engraving, in particular, adds significant value to our products, allowing you not only to see the strength and quality but also to feel them. This attention to detail ensures that our switches not only meet but exceed your expectations, providing a personalized touch to your hotel's interior design.

Positioning the switch at the same height of the door handle creates a perfect match.

Lithoss takes the switch part a step further with these door handles. This series perfectly reflects the typical Lithoss DNA and is the result of Lithoss's consistent design philosophy.

Arpi

Bronze

With over 30 years of proven robustness and watertight performance, Arpi sockets reliably supply underfloor power and data. They offer practical functionality by delivering electrical power or data in open spaces such as beneath dining room tables or next to sofas.

Available in multiple finishes, brushed or polished, Arpi sockets blend smoothly into interiors, discreetly and elegantly supplying currents underground.

Designed to withstand the most demanding environments, Arpi sockets remain resilient against heavy traffic, making them ideal for locations like shopping centers and exhibition halls. For added safety in public spaces, a safety cap is available, which can be opened using an Allen key.

Arpi IP64

4. Printing / engraving symbols

To personalize our switches, text (in the language of your choice) or symbols can be printed or engraved on the button and/or coverplate. These symbols can be printed via a special silk-screen process. The colour of the print depends on the chosen finish, for example a silver symbol on a gunpowder black coverplate. A true added value to our products is laser engraving so you don't only see the strength and quality of our products, you also feel them. By choosing the correct laser setting you can burn the surface locally in order to obtain a discrete black symbol or laser deeper to make the symbol appear in the base material. Other symbols can be printed or engraved when quality images are supplied.

Engraving our buttons and plates reveals following surface colour:
Stainless Steel / Nickel / Brushed brass / Copper / Tin Antique : black
Bronze Antique / Brass Antique : brass
Gunpowder Black : red copper
Ano colours : grey

Engraving following plates reveals following surface colour:
Matt White / Textured White : black
Matt Black / Textured Black / Anodic Brown / Anodic Bronze : light grey

Engraving following buttons (Select) reveals following surface colour:
Matt White / Textured White / Matt Black / Textured Black / Anodic Brown / Anodic Bronze : brass
